

Migrate with *ctac* Fast Track

- CTAC's Fast Track content tool, developed for Federal sites, scrapes common content file types (Drupal 7/8, PHP, Wordpress, HTML, .NET, and Dreamweaver) from legacy systems allowing for faster migration to Drupal
- CTAC's Fast Track migration teams are Acquia certified and lead our low cost/efficient migrations to Drupal leveraging our experience and processes refined over the last 10 years
- CTAC Fast Track migrations are completed within 90 days
- CTAC Fast Track migrations Drupal sites are Container and Cloud ready or can be deployed to existing traditional infrastructure
- CTAC Fast Track migrations ensures compliance with Federal Mandates and directives including, Integration with the Digital Analytics Program to ensure compliance with OMB M-17-06, Section 508 Compliance, Multilingual support, and integration with US Web Design Standard templates (USWDS)

PLAN

- Data migration strategy
- Data Mapping
- Content Audit
- Data analysis for removal of redundant, obsolete, and trivial information

DESIGN

- Content organization & architecture
- Custom theming and templating
- Planned Enhancements
- Roles & Permissions
- User tested workflows

BUILD

- Established USWDS templates, Established Migration templates and processes
- Integrate into existing or new agency environment

MIGRATE!

- Data cleanse & categorization
- URL corrections for new paths
- PDF keyword scrapes
- Data transformations
- File collections

SUPPORT

- No vendor lockin
- Comprehensive training
- Continuous DevOps and Drupal support

CTAC provides clients with turn-key Drupal migration to meet their agency's critical digital needs for consumer engagement including a modern looking website, search, Section 508 compliance, Digital Analytics Program (DAP), and responsive design leveraging CTAC's Fast Track Migrations which have refined and proven by solving the complexities associated with Federal websites.

CTAC's Fast Track migration content tool scrapes all current content and loads it to a Drupal 9 database through automated scripts.

CTAC's Fast Track migrations team built the Fast Track content tool for Federal websites to automate migration of common content types including .pdf, doc(x), ppt., .jpeg, .gif, HTML, and other common file formats.

The Fast Track content tool also supports frameworks such as legacy Drupal versions, Dreamweaver, Sharepoint, Wordpress,

and PHP that are common across Federal websites. CTAC's dedicated Fast Track migration teams then integrate existing content into established Drupal 9 templates.

CTAC templates are WCAG 2.1, Section 508 compliant and responsively designed using the US Web Design Standards (USWDS) Drupal 9 theme and templates to transform the agency's website.

CTAC then works with the agency to customize USWDS and Drupal templates to meet their agency's functionality needs / requirements. All Fast Track migrations are compliant with Simple Sign On (SSO) / Identity provider to allow PIV card login via Security Assertion Markup Language (SAML).

Fast Track Drupal 9 sites have flexible search options and can be integrated with common Drupal search engines including GSA search, Google Search, or Drupal API search (out of the box search options) that are highly customizable.

CTAC Fast Track provides customers with consistent and constant feedback during our transparent build process where progress, risks, and timelines are well defined and understood by all stakeholders.

CTAC's Fast Tracked Drupal Migrations

Additional Migration Service Offerings

In addition to our Fast Track Migration offering, CTAC can provide the following services and expertise to truly transform their website and fully leverage Drupal and Cloud technologies:

- Google AI and Alexa Skill integration: CTAC's award winning, Alexa certified personnel provide customized AI capabilities for agencies to better engage with their users. CTAC will create a custom Alexa skill and Google Assistant that will engage users through personal devices providing a unique and transformative medium to share information with users.
- Cloud Hosting solutions: CTAC's Fast Track migration team is supported by our DevOps Professionals who have provisioned and managed Drupal sites built in the AWS Cloud, Azure Cloud and Google Cloud environments. CTAC Fast Track migrations to the Cloud provide Agencies with a more cost-effective, flexible, reliable, and secure environment over traditional on-premise hosting solutions. Additionally, CTAC's DevOps teams have supported ATO and EPLC processes as part of an agency's Cloud Migration strategy. CTAC is an Advanced Amazon Web Services Provider, with Letter of Supply.
- Advanced Analytics integration: In addition to compliance with DAP as part of the Fast Track Migration, CTAC will create custom analytics providing site metrics and insights on what types of devices are used to access site, geographic location of users, page and site metrics for most accessed page and source. Furthermore, agencies can gain insights into user behavior and terms used to search and find their content, allowing for better insights and user engagement.
- CTAC enhanced Drupal search can complete Optical Character Recognition (OCR) for older PDF files, which will update the file so the contents can be found and users will be able to have a truly inclusive search for all content. Older files that have hand written notes or degraded text historically have only been searchable as an image and not the full text by completing OCR text is digitalized and therefore can be indexed through Search.

About CTAC

CTAC Fast Track and CTAC personnel are industry best credentialed personnel who have numerous Aquia certified Drupal developers, Project Management Professionals, UI team who are also Nielsen Norman Group certified UX Masters, and AWS certifications.

CTAC Fast Track has been successfully used by numerous Federal agencies to transform and modernize their website. In addition to CMMI and ISO certifications, CTAC holds the AWS Government competency and DevOps.

Communications Training Analysis Corporation (CTAC) is a mature small business with a reputation as a trusted information technology partner of Federal Civilian and Defense agencies for over 27 years migrating, managing, and supporting over **25 Federal sites**.
